

Veridian Homes, an innovative company with an emphasis on smart growth and green built practices, is looking for talented and passionate individuals who demonstrate drive and integrity to join our team! We've grown to be Wisconsin's largest builder by never losing sight of what actually makes our company successful—**our employees.**

Customer Care Representatives

If you are a positive, quality-focused individual with exceptional people skills, this is the role for you! Our Customer Care Team coordinates responses to homeowner warranty requests, schedules services with the homeowner and trade partners, works directly and daily with the Personal Builders, tracks and reports service data, and more! The successful candidate will possess strong attention to detail and superior customer service skills, along with the proven ability to manage multiple priorities and provide consistent follow-through. Hands-on experience with MS Word and Excel is required. Education and experience in residential construction is desired.

Assistant Personal Builders

In this role, you will receive hands-on training and expertise by working with our Personal Builders to provide outstanding customer service and deliver quality-built homes. The successful candidate will possess strong attention to detail, superior customer service skills along with the proven ability to manage multiple priorities and provide consistent follow-through. Candidates must have a valid driver's license, clean driving record and a reliable personal vehicle. A bachelor's degree in construction management or equivalent or a year of previous residential construction experience is required.

Building Information Modelers

Key responsibilities of this role include creating an accurate model and estimate for all homes, developing site plans for new community phases and individual customer home sites, as well as creating and updating models and estimates to improve our plan portfolio. The successful candidate will have strong attention to detail, good interpersonal and teamwork skills and a positive attitude. Candidates will be required to become proficient in Revit and Timberline (estimating software) and must enjoy working closely with many different personalities and departments.
